

XELOR

SEED INVESTOR BRIEF · OCTOBER 2026

The trusted network behind what India manufactures.

Suppliers, job shops, assemblers and manufacturers, connected through records earned on every delivery.

Raw material

Foundry

Machining

Coating

Assembly

Manufacturer

THE PROBLEM

1.8 crore
manufacturers.
No shared record
of who delivers.

Every order still rides on a WhatsApp promise, a phone call and gut feel. When a delivery fails, nothing is recorded, so the next order goes to the same guess.

MANUFACTURING MSMES ON UDYAM, JULY 2026

WHATSAPP

“Castings will reach by Friday, sir.”

Tuesday. Still waiting.

PHONE CALL

“Same rate as last time?”

Nobody knows last time.

PAPER REGISTER

“60 received. 2 cracked.”

Never reaches any system.

PAID DIRECTORY

“Trusted seller” badge.

Checks identity, not delivery.

Lines stop

when one late part holds up an order

Rejects surface

after the supplier is already paid

Good suppliers stay invisible

with no way to prove they deliver

THE COST

No record means no trust. Factories pay for it every day.

12%

of Indian MSMEs use ERP software. The rest track suppliers in notebooks and chats.

RIS, 2026

~2.5%

of the 8.8M sellers on IndiaMART pay to be listed. Most MSMEs are priced out of being found.

INDIAMART Q1 FY27 • OUR ARITHMETIC

3-4×

Each number is typed three or four times across separate systems.

WHAT WE SEE ON THE SHOP FLOOR

Every factory already creates the proof. **Nobody keeps it.**

XELOR turns every order into a supplier record you can trust.

1

Ask

The request for quote writes itself. Suppliers reply from a link, with no login.

2

Compare

Quotes ranked on price, delivery date and each supplier's track record.

3

Decide

A person picks the supplier. The owner approves on the phone.

4

Record

When goods arrive, on-time and quality results update the record.

RESULT

Records come from **real deliveries**, so they can't be typed in, bought or faked.

HOW THE RECORD IS EARNED

One scan at the gate.
The record updates.

- ✓ **On time?** Counted from the receipt date.
- ✓ **Quality?** Counted from the inspection.
- ✓ **New supplier?** Shows “unproven” until it delivers.

Sri Ganesh's record, updated

By this receipt and inspection, not by anyone typing

Deliveries	18	→	19
On time	94%	→	95%
Pieces checked	1,140	→	1,200
Rejected	0.88%	→	0.83%

Next time Kaveri asks for castings, this record feeds the ranking.

Stores & quality · tablet at the gate.

One database: every module reads the same order.

BETTER DECISIONS

Compare suppliers on proof, not promises.

- ✓ Every quote shows the supplier’s real on-time and reject rates.
- ✓ The ranking explains itself. A person always decides.
- ✓ The best supplier wins on proof, not just price.

FLAGSHIP

XELOR Market.

See the proof first.

- ✓ Every seller shows an **earned delivery record**.
- ✓ **Free to list**, or ₹249 a month for Verified.
- ✓ A request goes to **5 sellers at most**. Never resold.
- ✓ Find help: repair, testing, compliance, finance.
- ✓ Buyers and sellers pay each other. **We never touch the money.**

XELOGRAM

Show your factory. Win new buyers.

- ✓ A verified delivery becomes a post in one tap.
- ✓ Captions in Tamil, Kannada, Hindi or English.
- ✓ Every post has a **proof badge** and a **Request quote** button.
- ✓ Shares to WhatsApp Status, used by 97% of MSMEs.

THE ENGINE

The software that builds every record.

- ✓ Sales, purchase, stores, production and accounts on one record.
- ✓ It drafts and follows up. **People approve** money and stock.
- ✓ Works beside Tally. Sold one department at a time.

Every request **grows the network.**

01

A factory sends a request

To its usual suppliers and new ones.

02

Suppliers quote from a link

No login, no app, by text or voice.

03

They claim a free record

And use it with every XELOR buyer.

04

Buyers check the proof

Records decide who wins the order.

05

More factories join

And trade with each other directly.

MOAT

Delivery history takes years to build and **can't be copied or back-filled**. We start dense, in one cluster.

WHY NOW

AI is everywhere. Verified data isn't.

AI models

Anyone can rent one.

COMMON

AI tools for buying

Many funded startups build these.

CROWDED

Verified delivery data

Only comes from real work at the factory gate.

RARE • XELOR

Apr 2024

45-day payment rule

Pay small suppliers late and lose the tax deduction.

Aug 2023

E-invoicing at ₹5 crore

Every B2B invoice registered with the government.

Sep 2026

TReDS guarantee

Lenders back small-firm invoices, with proof of delivery.

COMPETITION

Others list suppliers.
Only XELOR proves them.
