

Earn trust with every delivery. Get found for the work you do.

XELOR is the trusted supplier network for Indian factories. Our agentic AI ERP turns receipts, inspections and shipments into a verified record. XELOR Market and Xelogram let MSMEs use that proof to find, trust and hire each other.

- Agentic AI ERP
- Verified supplier records
- XELOR Market
- Xelogram

The work is done. The proof is scattered.

Receipts, stock, supplier messages and shop-floor notes sit in separate places. People copy the same numbers between them, and nobody can see who keeps their promises.

3–4×

Each number is entered three or four times across separate systems.

WHAT WE SEE ON THE SHOP FLOOR

12%

of Indian MSMEs use ERP software. Digital payments are at 87%.

RIS, 2026 · SURVEY OF 2,882 MSMEs

70%+

of recent ERP projects are expected to fall short of their business case by 2027.

GARTNER

≈ ₹1.7 Cr a year

lost to stops, scrap, idle stock and retyping at a ₹20 crore plant. Illustrative, from published benchmarks; the pilot measures the real cost.

Every factory already creates the proof. **Nobody keeps it.**

AI is everywhere. Verified data isn't.

Models

Rented by anyone. Cheaper every quarter.

COMMODITY

Agents

20+ funded by YC alone to write RFQs and chase suppliers.

CROWDED

Verified data

Counted from receipts, inspections and payments. Can't be scraped, bought or back-filled.

SCARCE • XELOR

A model needs reliable evidence.
The factory creates it every day.

Models are widely available. A supplier's delivery history, a factory's return rate and the prices it paid come from real work. XELOR captures that evidence inside the factory's ERP, where agents, lenders and buyers can use it.

01 • BETTER PRICES

The best rate, both ways

Buyers compare landed cost and delivery history. Reliable suppliers compete on proven performance as well as price.

02 • CHEAPER MONEY

Credit priced on proof

Accepted invoices and on-time deliveries beat a GST score. MSMEs face a credit gap of about ₹30 lakh crore (SIDBI, 2025).

03 • FOUND FOR WHAT YOU DO

The right buyer finds you

XELOR Market and Xelogram rank factories by what they delivered, not by who paid for the top slot.

More rules. A greater need for records.

These rules and market shifts raise the need for reliable records. ERP adoption is only 12%; agents can take the work out of keeping them.

APR 2023

Audit trail

Books in software, with an edit log that cannot be switched off.

AUG 2023

E-invoicing at ₹5 crore

Every B2B invoice is registered on the government portal.

APR 2024

45-day payment rule

Pay a small supplier late and lose the tax deduction.

APR 2025

30-day invoice window

Above ₹10 crore, older invoices can no longer be reported.

FY 2025-26

Order platforms scale

Zetwerk reports ₹15,913 crore across 6,979 suppliers. Buyers choose shops on proof.

MAY 2026

Business AI on WhatsApp REPORTED

Agents can answer on the channel every supplier already uses.

AUG 2026

MSMED amendment REPORTED

Pushes more small-supplier invoices through TReDS.

SEP 2026

TReDS gets a guarantee REPORTED

CGTMSE covers 75% of defaults on small-firm invoices on TReDS. Lenders still need proof of delivery.

Agents prepare. People decide.

1

The agent drafts and chases

It reads the customer's PO, drafts requests from the BOM and quality plan, and follows up with suppliers on a no-login link.

2

A person decides

People confirm, award, approve, release and pay. Above the buyer's limit, the owner approves on a phone.

3

The work writes the record

Receipts, inspections, shipments and payments update the record. Nobody types a performance score.

● Stations that write a record: the supplier's at the gate, the factory's at dispatch and payment. In the product: one order for 80 pumps at a Peenya pump maker.

Seven roles. One record. Nothing typed twice.

Purchase on a laptop. Approvals and quotes on a phone. Stores on a tablet. Every role works from the same records.

- ✓ The XELOR Agent shows completed work, follow-ups and decisions waiting for you.
- ✓ Suppliers quote by message link or voice note. No login, no app.
- ✓ Above a buyer's limit, the purchase order goes to the owner's phone.
- ✓ A seventh role brings together XELOR Market, Find help and Xelogram.

PURCHASE · OWNER · SUPPLIER — CAPTURED FROM THE PRODUCT

Start with one department. Expand when it pays.

Most plants that bought an ERP use billing and stock, and the rest goes back to the register. XELOR is sold one department at a time, on one shared record.

STORES & QC • ONE SCAN POSTS THE RECEIPT AND UPDATES THE SUPPLIER'S RECORD

ACCOUNTS · EVERY LEDGER LINE WRITTEN BY AN EVENT, SYNCED WITH TALLY

Performance is earned. The records show it.

01 Counted, not typed

On-time and reject rates come from goods receipts and incoming inspections. Reads “unknown” until a delivery is counted.

02 Unproven means unproven

A supplier that has never delivered scores nothing for track record. It never borrows anyone’s average.

03 The factory earns one too

Shipments, returns and on-time supplier payments write the factory’s own passport, shared as a read-only link.

Ranked with reasons; a person decides. Ranking weights are a design proposal.

October 2026 scan. Some directories were blocked, so not finding a company is not proof it does not exist.

Factories pay per plant.

Listings cost ₹8 a day.

The plant fee includes every user and the agent. Supplier records are free. XELOR never holds or moves money. Launch prices are under test.

PAID PILOT

₹20,000

Six weeks, one workflow, a signed baseline. Credited in full on conversion.

ONE PLANT

₹50K / month

₹6 lakh a year. The whole plant, the agent, two connectors, every user.

XELOR MARKET • VERIFIED

₹249 / month

Identity and earned-record badges, matched buyer requests. Free listing for all.

SUPPLIERS

₹0

A free record, quotes from a link and a capacity calendar.

ONE PLANT, PER YEAR

₹6.0 L

subscription

₹4.5–4.7 L

gross profit at 75–78% target

₹8 L

cost to win a plant (assumption)

~21 mo

to earn back that cost

Later, not live: referral fees from RBI-regulated TReDS and lending partners, who pay suppliers directly. A pilot converts at full price only after showing ₹30 lakh of yearly value, 5× the fee.

MARKET SIZE, BUILT BOTTOM-UP

TAM • all of India

₹7,947 Cr ~\$900M

1.83 Cr manufacturing MSMEs × ₹2,490 = ₹4,561 Cr
47,762 factories with 100+ workers × ₹6 L = ₹2,866 Cr
₹3.47 L Cr TReDS invoices (FY26) × 0.15% = ₹520 Cr

SAM • Karnataka + Tamil Nadu

₹504 Cr ~\$57M

7,330 plants with 100–499 workers × ₹6 L = ₹440 Cr
1.53 L MSMEs in Bengaluru, Hosur, Coimbatore = ₹38 Cr • referrals ₹26 Cr

SOM • year 5

₹13.7 Cr ~\$1.6M ARR

220 plants (3% of SAM) + about 450 paid listings + referrals

Sources: Udyam (Jul 2026), ASI 2023-24, TReDS platform data (FY26). Conservative: excludes plants under 100 workers and other states.

Features can be copied. Delivery history takes time.

Our advantage must come from connected delivery history.
These are the competitive responses we plan for.

IF A FUNDED AI AGENT MOVES DOWN-MARKET

It sits on someone else's ERP

Didero, Mandel AI and Magentic read other systems.
The record is counted where XELOR runs: at the gate.

IF TALLY, ZOHO OR INDIAMART + BUSY GO DEEPER

We start beside them

A network layer synced to Tally, Busy or Zoho, then
the full ERP when the plant is ready.

IF AN ORDER PLATFORM BUILDS THE RECORD

They are outside the factory

Zetwerk and Wootz see their own orders. None of
them sits where a delivery is counted.

WHY THE RECORD WINS

It cannot be back-filled

Each receipt adds dated delivery and inspection
evidence. The advantage needs a dense cluster of
plants.

How we win the cluster

DENSITY BEFORE SPREAD

1

Ten plants that trade

Pilot factories in Peenya chosen because they buy
from each other, so records start dense.

2

Start beside Tally

The network layer first, synced to the books they
already keep. The full ERP when ready.

3

Every request invites

Suppliers claim free records. Their other buyers see
them, and the cluster fills itself.

4

Then the next cluster

Hosur next door, then Coimbatore's pump makers. We
win on GST, Indian languages and WhatsApp.

Engineers with factory-facing experience.
