

Earn trust with every delivery. Get found for the work you do.

XELOR is the trusted supplier network for Indian MSMEs. Our agentic AI ERP turns a factory's everyday receipts, inspections and shipments into verified records. XELOR Market and Xelogram put that proof to work, so factories can find, trust and trade with each other.

THE PROBLEM

Small factories find suppliers on WhatsApp and phone calls. **Nobody can see who actually delivers on time.**

12%

of Indian MSMEs use ERP software (RIS, 2026)

~2.5%

of IndiaMART's 8.8M storefronts pay; most MSMEs are priced out

HOW IT WORKS

01 · ASK

AI writes the RFQ

From the shortage, BOM and quality plan. Suppliers reply on a link, no login.

02 · COMPARE

Quotes ranked

On price, delivery date and each supplier's track record, with reasons.

03 · DECIDE

A person approves

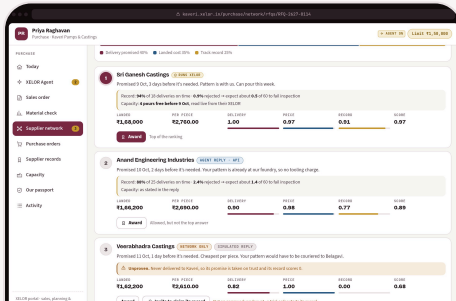

The buyer awards. Above the limit, the owner signs on the phone.

04 · RECORD

Proof is earned

Receipts and inspections update the supplier's record. Nobody types it.

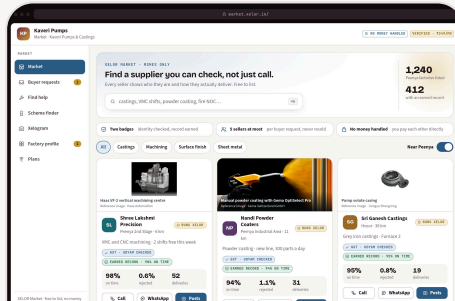

THREE PRODUCTS, ONE TRUSTED RECORD

FOR THE FACTORY

Agentic AI ERP

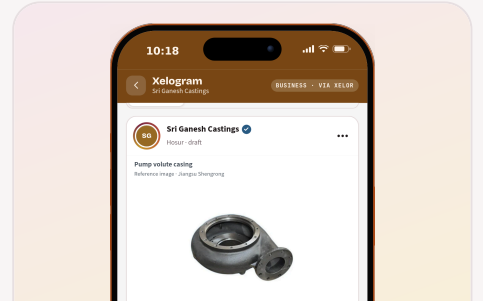

Sales, purchase, stores, production and accounts on one record. The agent drafts and chases; people decide. Synced with Tally.

FOR EVERY MSME

XELOR Market

Find suppliers and services with earned records. Requests go to five sellers at most, never resold. XELOR never touches the money.

FOR GETTING FOUND

Xelogram

A verified delivery becomes a post, captioned in Tamil, Kannada, Hindi or English, with a Request quote button.

WHY IT IS DIFFERENT

- ✓ **Records come from real work.** Counted at the factory gate, so they can't be faked or back-filled.
- ✓ **Clean incentives.** No lead reselling, no auto-debit, no money handled by XELOR.
- ✓ **Agents remove the typing.** Small factories get an ERP that runs itself; people only approve.
- ✓ **Every request grows the network.** Suppliers join free to quote and bring their other buyers.
