THE PROBLEM

Finding suppliers is guesswork

Owners rely on WhatsApp, phone calls, word of mouth and long visits.

Listing sites cost too much

A paid listing is ₹32,000+ a year. Most small businesses can't afford it.

No way to know who's reliable

So owners take risks, or pay more just to be safe.

HOW THE XELOR NETWORK WORKS

OUR CORE

Every delivery builds a track record.

01

A factory orders

From a supplier, through XELOR.

02

Supplier delivers

The goods reach the factory.

03

Delivery is checked

On time? Right amount? Good quality?

04 • TRACK RECORD

Sri Ganesh Castings

05

Good work gets noticed

Reliable suppliers get more orders.

The network grows with every order. When a factory asks a new supplier for a price, that supplier joins free and brings its own customers.

More orders

More records

More trust
